Wellness Plans

Are you finding vet bills hard to budget for alongside all your other bills and expenses? Would you like to split the cost for your routine veterinary care into predictable and more affordable monthly payments?

Wellness Plans **are not** the same as Pet Insurance where you pay for coverage you may never use. With a Wellness Plan you will be provided with all the recommended preventive pet care you’ve paid for – helping you keep your pet on the path to good health!

Read on to see which of these annual plans best suits you.....

✚ Puppy/Kitten Plans (up to 1 year of age)

- Complete set of core vaccinations for the first year
- Comprehensive physical exam at each vaccination appointment
- Feline leukemia/FIV test (for cats only)
- Fecal exam for intestinal parasites
- Pre-anesthetic blood-work (basic profile)
- Spay/neuter with post operative laser treatment
- 2Kg bag puppy/kitten food
- Micro-chipping at time of spay/neuter

.....

✚ Young Adult - Standard (1-7 years)

- Comprehensive physical annual health exam
- Annual vaccinations
- Pre-anaesthetic blood-work profile

We would love to help you with any of our plans - please telephone or e-mail Keri (Hospital Manager) at Otonabee Animal Hospital (705) 743-4936 or oah@bellnet.ca - she will be more than happy to hear from you!

STAFF PIX 😊

Dr Lindsay Prior graduated from the Ontario Veterinary College in the spring of 2008 and moved to the Peterborough area to work as a companion animal/exotics veterinary. Her interests include exotic animal medicine and surgery. Dr Prior's first love is rabbits; some have even dubbed her "the rabbit whisperer". Working at Otonabee Animal Hospital gives her the opportunity to work with all kinds of species, including but not limited to cats, dogs, rabbits, ferrets, pocket pets and even reptiles

Dr Prior currently, a French Bulldog named Pierre, a Boston Terrier or "Terror" named Ruby and 4 cats; Molly, Mabel, Matilda and Stu. Her newest addition, Mabel, was an abused kitten with a heart of gold. She was brought in to see Dr Prior with spinal cord swelling (she was unable to move her hind legs) and a serious uterine infection. Dr Prior adopted her, spayed her and gave her lots of TLC and special care. Now she is running, jumping and playing...she even chases the dogs!
