## August 2017 Newsletter Who is Marilyn Wright?

*Welcome to another staff mini-bio! This time we will be taking a look at Marilyn’s background.*

*Born & raised in Janetville, Marilyn is a country girl at heart & she and her partner Jim are currently developing an off-grid property up north.*

*She loves to take photographs, especially of wildlife & flowers and has a deep love of crystals.*

*Sadly, as many of you may already know, Marilyn recently lost one of her dogs (Silas) to cancer. However she still has Jep, 100lb of almost 5 year old Maremma/Border Collie mix to keep her busy. Dunford (the clinic cat) has also worked his magic to bring out the hidden cat lover in Marilyn who, although she was fond of cats, had previously always thought of herself as a “dog person”. He can often be found sitting on her lap or even her keyboard tray while he oversees the running of everything.*

*Marilyn has accumulated quite a knowledge of antiques over the years, working for an auction company in her spare time. In addition to this, she enjoys working with tools on various projects/repairs as well as creating jewellery & other beautiful craft items. One of her favourite things to create with is sea glass.*

*Marilyn joined our team in 2001, just after our clinic opened. She is one of the first voices you’ll hear in the morning, and one of our several caring voices calling for follow-up after your companion animal has visited with us for surgery or other procedures. She treats every client and patient in the same manner as she would want to be treated herself.*
